Project 1: Personal Profile Page

Sections of this Guide:

- **How to approach this project** includes detailed guidance to help you think about how to organize your code, project and files.
- **How to succeed at this project** lists the grading requirements for the project, with hints, links to course videos to refresh your memory and helpful resources.

How to Approach this Project

For this first project, most of the heavy lifting is already done for you.

❏ **Download the project source files from the [project instructions page](#) in your Techdegree curriculum.**

   After downloading and unzipping, you should have the following files.

   - index.html
   - styles.css
   - And an image folder containing:
      - me.png
      - portland.jpg
      - and three social media icon SVGs.

❏ **Next, set up a GitHub repo and push the project files to it.**

   ❏ *Related video: [Share Your Projects with GitHub](#)*

❏ **Use the [project instructions page](#) and this guide to make some great changes to the project source files**: *details below in the "How to Succeed at this Project" section.*
   ❏ *Related Video: [Project Intro Video](#)*
   ❏ *Curious about text editor options: [Text Editors](#)*
   ❏ *Want to learn more about using Workspaces: [Using Treehouse Workspaces](#)*

❏ **Double check everything, validate your files, request an informal review in Slack, and then submit.**

How to Succeed at this Project

❏ **Include Required Files**

The image below is an example of what your project directory should look like.

```
📁 project_1_personal_page
▼ 📁 images
     github.svg
     linkedin.svg
     me.png
     new_background.jpg
     new_profile_pic.jpg
     portland.jpg
     twitter.svg
   index.html
   styles.css
```

❏ **Links**

Change the href value of the Home link to `index.html` , and make sure all other links work or are deleted, including the social media links at the bottom of the page.

   ❏ *Related video:* Anchor Tags
   ❏ *Related video:* Linking it All Up

❏ **Add a Photo and Background**

Replace the profile pic (**less than 400 KB**) and background image (**less than 1 MB**), and update the `alt` of the `<img>` tag.
